

Ami Ami

Tokujiin Yoshioka

Inspired by the play of warp and weft in woven fabric, Tokujiin Yoshioka wanted to use this stylistic symbol typical of his culture, weaving, and thus recreated it in the Ami Ami chair and table whose name in Japanese literally means “weave”. The simple squared off lines contrast with the rich texture of the weaving reproduced on the inner and outer surfaces through a complex industrial process recreating the motif with a single mold. Ami Ami combines the appeal of oriental culture with the use of innovative materials like polycarbonate and comes in two transparent clear and smoked versions and three matte versions of white, red and black. The Ami Ami seat matches the table with a square polycarbonate top measuring 70x70 covered by the weaving motif and painted aluminium legs.
