

Three Baskets of Knowledge

David Trubridge

- Kete Aronui: 1.5mm caramelised bamboo plywood, hand sanded PETG, plastic clips. Bamboo is a truly sustainable resource taking carbon out of the air as it grows.
- Kete Tuauri: aluminium, hand sanded PETG plastic, aluminium rivets. Aluminium is expensive to make but very cheap to recycle.
- Kete Tuatea: hand sanded PETG, nylon clips.
If plastic could be 100% recycled would it be better than wood?

Bamboo (Kete Aronui) 2100H x 830mm diameter

Aluminium (Kete Tuauri) 2100H x 830mm diameter

Plastic (Kete Tuatea) 2100Hx 830mm diameter
