

Spoon Table

Antonio Citterio con Toan Nguyen

Spoon Table is a folding light office table characterised by its extreme lightness and practicality. The structural surface is made of honeycomb aluminium and is only 15 mm thick. The finish is white laminate whereas the methacrylate edges are coloured on the bottom so that the transparency creates a sense of depth.

The thermoplastic legs are a guarantee of resistance and elasticity. The knee mechanism closing was developed for easy folding of the top and makes the Spoon Table perfect for living in small spaces and easy carrying. The leg-locking system requires no tools and works using only a slider eyelet. The Spoon Table comes in three sizes of top and with legs and matching edges in three colours.

		width	height	depth	weight kg.
4506		140	72	70	16,500
4507		160	72	80	18,500
4508		200	72	90	20,000

Material

Tabletop: honeycomb aluminium and melamine laminate

Leg: batch-dyed modified polypropylene
