

# Mauna-Kea Vico Magistretti

The stool and table completes the Mauna-Kea family. The stool is produced in two heights: 65 and 75 cm. The small backrest projects from the seat by means of a connection to the support, thus complementing the overall design. The seat is available in four colours: aluminium, slate-grey, metallized blue and white. The structure is in polished aluminium. The Mauna-Kea table is ideal for the business market - for indoor use only - thanks to the optimal durability of its component materials and to its technical characteristics. The product's formal elegance and the refined choice offered by the chromatic compositions make Mauna-Kea a table for use in homes, too, from the kitchen to the dining room.

## Materials

**Seat frame:** painted die-cast aluminium

**Leg and backrest frame:** polished tubular aluminium with scratch-resistant coating

**Seat and backrest:** batch-dyed polypropylene
