

Hi-tech style trolleys with the specific core function of supporting a stereo system or television, thought up universally for the home or for work spaces. The principle feature of Oxo trolleys is their rational design, mobility and stability, guaranteed by auto-lock castor wheels, and the durability of their surfaces. A characteristic structural and formal feature, conjured up by the very name of the collection, is the "X-shaped" element which laterally connects the chromed steel supports. It can carry a load of up to 50 kg.

Oxo is specifically proposed for computers and technical support. In a landscape in which the PC is by now an indispensable presence and tool, it has become necessary to create specific furniture proposals. Oxo PC meets these needs. Suited to both office and home, the Oxo Pc trolley is a flexible accessory, thanks to the extractable keyboard shelf and the integral mouse shelf, which can be positioned on the right or left. Thanks to auto-lock castors, Oxo PC guarantees both mobility and stability.
