Plastics Duo Piero Lissoni

The fabric covering the Plastics seating modular system featuring transparent polycarbonate little feet lends an air of greater refinement and sophistication. In fact it becomes a veritable sofa for the home, comfortable and soft, elegant but easy.

The seat now comes in two different sizes, 88 and 114 cm, and two different heights for the arms. There are still three different models of the sofa: a seat with back, the version with a right arm and the version with the left arm. A pouf can be added.

The velvety Nile and Eskimo fabrics are sturdy and very easy to maintain, available in a range of soft shades from white to dove and from olive green to orange.

Nilo fabric
