

# Toobe Ferruccio Laviani

Toobe is the first Kartell floor lamp, a passe-partout which completes the lamp range. Toobe by Ferruccio Laviani is the result of an ingenious idea to use an extruded PMMA pipe which, according to the different lengths, can be used to produce table or floor lamps. The innovative dye technology used makes Toobe the first Kartell product to be "shaded", due to the diffusion of a particular light within the cylinder. It has a simple and modern design. The lamp unit has a flush handle which makes the base extremely functional and easy to move.
