

TopTop Philippe Starck with Eugeni Quitllet

TopTop is an original table that simultaneously combines a polished and transparent surface. The line is minimal, simple and essential. Available in various versions and dimensions that make it versatile and suited to different use needs. The tapered and transparent legs with squared section and pleated surfaces have a metal core. The TopTop table line proposes large rectangular or square tops. Precious wengè wood and bleached oak variations are proposed to enhance and complete the line, in addition to the glossy lacquered polyester top.
